JOB PORTAL

INSTRUCTION: Create an online job portal web app for a job seeker (student) and job provider (company). The Student or Job seeker can easily find and apply for a job by logging into the system. The Employer or company can easily get an expert employee from our job portal site by posting a job. Maximize the use of the Python Django web framework.						
MAIN FEATURES						
1	**Layout**. The layout must be consistent throughout the web app, easy to navigate, with proper alert and prompt messages.	20	15	10	5	1
2	**Account Registration**. Users shall register accounts before using the web app. Allow the user to provide a username and email address (both shall be validated for entry duplication).	10	8	5	3	1
3	**Log In and Log Out**. Allow the user to choose from a username or email when logging in. Confirm before logging out.	10	8	5	3	1
4	**User Profile**. Users must be able to edit or delete their accounts. Users must be able to upload a profile picture. Changing the password shall ask for the old password and the new password and confirm the new password.	15	12	8	4	1

#	Description					
5	**Administrator**. Admin must be able to manage the complete job seeker's section. Like: Activate/deactivate/ Edit Job Seeker's Information. Admin can view the Job seeker's applications for each job. Admin must be able to manage the complete job seeker's section. Like: Activate/ Deactivate/ Edit Company Information. Admin can manage posted jobs. Like: Activate/ Deactivate/ Edit Job.	30	22	15	7	1
6	**Report Generation**. Admin must be able to generate reports such as (1) List of Users; (2) Activity Logs; (3) List of Jobs; and (4) List of Company.	30	22	15	7	1
7	**Job Provider/Company**. Can add/edit the Company's Profile. Post new job vacancies. Can edit/deactivate posted jobs. Job providers can view and download the job seeker's resume.	25	19	13	6	1
8	**Job Seeker**. Search for jobs. Add/edit profile information, including qualifications, experience, and skills. Upload the latest resume.	20	15	10	5	1
9	**Main Website.** From the main website, the user can perform the following actions: Search jobs based on the skills, city, country, or job title. • **Part-Time and Full-Time Openings** To cater to every type of job seeker out there, your job portal should be able to distinguish between part-time and full-time job listings. It should also provide the right based on the applicant's choices and search query	20	15	10	5	1
10	**Job alerts.** This feature allows users to receive an alert whenever a new job that matches what they looking for is posted. They have a choice to receive the notifications via email or text message.	20	15	10	5	1

Legend	Description	Comment
1	Poor	The item is not working. Item is not available for evaluation.
7/6/5/4/3	Needs Improvement	The item works but has several errors. Errors include: 1. No Data Validation 2. Data is not correctly displayed 3. Data is not correctly updated 4. The session is not handled correctly

15/13/10/8/5	Satisfactory	Item works but has no data validation. The session is implemented correctly. Errors include: 1. No Data Validation 2. No Data Duplication Validation
22/19/15/12/8	Very Satisfactory	The item works well; no bugs are found. The transaction is implemented via Web development frameworks. The data format is validated correctly, and there is no data duplication.
30/25/20/15/10	Excellent	Item works well, no bugs are found, and has data validation.
